Information for Customers Operating and Maintaining Belvac Machines

ISSUE 2, VOLUME 11, APRIL 2008

## Bottom Coater Sleeved Applicator Rolls Color Change

Belvac has supplied BV78/80, BV85 and BV86 sleeved (replaceable) applicator rolls for many years, in a variety of materials and hardnesses. The color of the applicator roll sleeves has varied over the years, depending on the pigment added by our suppliers. In an effort to control costs, our suppliers have standardized on the color "black" for all applicator rolls, regardless of the material and/or hardness. The color of the roll has no impact on the performance or specification: this is only a cosmetic change.

Belvac is advising our customer base the following applicator roll sleeves will be standardized on the color "black":

Part Number	Machine Model	Material	Hardness (A-Scale)	Thickness (inches)	New Color
10327-BV80	BV78/80	Urethane	7-12	1	Black
10331-BV80	BV78/80	Urethane	20-25	1	Black
11410HC900	HC900	Urethane	7-12	1	Black
702147	BV85/86	Urethane	20-25	2	Black
702148	BV85/86	Urethane	7-12	2	Black
702150	BV85/86	Urethane	20-25	1	Black
702151	BV85/86	Urethane	7-12	1	Black
702429	BV85/86	Dual Urethane	20-25 (50-Undercoat)	2	Black
702438	BV85/86	Dual Urethane	7-11 (50-Undercoat)	2	Black
702668	BV85/86	Dual Urethane	1-5 (50-Undercoat)	2	Black

Future applicator rolls may be added to the list without further notice. The new color is in effect after March 2008.
